The assembly set contains:

- a. 24 pc. angle 30x30x30 mm
- b. 112pc. stainless steel screws TORX V2A 3x30 mm
- c. 56 pc. stainless steel screws TORX V2A 3x16 mm
- 1 pc. drilling template
- 1 pc. wood drill 2.5 mm
- 1 pc. bit TORX 10

Wood is a natural product, therefore it may shrink spontaneously, depending on the air humidity. Thus, it is possible for the board dimensions to vary by +/- 0.5 mm in thickness and +/- 2 mm in width. Therefore, during assembly it is necessary to account the natural size difference. This means that if the assembly manual specifies dimensions, they should be corrected or changed as necessary, in order to keep the distances the same.

If you chose the variant with pre-cut or pre-cut and pre-drilled boards, start the assembly from the respective step.

Step 1

You need:

12 boards (16mm x 114mm x 1800mm)

Step 2

Measurement

Mark all the board and cut them in accordance with the cutting plan.

12x

*Bevel the cut edges using the sanding block

Step 3

List of parts

Arrange cut boards as shown on the included template.

WALL A x2

WALL B x2

TABLE C

ELEMENT D

Step 4

Drilling template

Use the drilling template to mark the holes. For initial drilling, use the included 2.5 mm drill bit. Drill only as many boards as specified next to the drilling template. Pay attention to appropriate colours, in order to match the holes to the respective board.

Step 5

b.) 3x30mm 16 pc.

**WALL A x2****Step 6**

b.) 3x30mm 16 pc.
